

To whom it Concerns:

My name is Charles Wurm. I have over 12 years' experience working in the Patriot Telecommunications field. I have worked on 17 successful Raytheon Patriot Systems Integration and Check Out's (SICO's) both as a U.S. Soldier and most recently on FMS contracts in Korea, Taiwan, and UAE as a Raytheon Communications Engineer. I have extensive knowledge and field experience working with most Patriot Communications systems. My experience includes an extensive background in various Patriot communications configurations from CE-0 to CE-3. CE-0 to CE-2 configurations utilizes circuit switched transmission systems such as the U.S. Army SMU, and the CPX-300 used in most FMS systems. I am currently working as a Raytheon Communications Engineer on the first CE-3 Patriot Communications system that is being deployed in UAE. This CE-3 system is a packet based network which utilizes TCP/IP Gigabit Routers and TOCNET's instead of the circuit based SMU and CPX-300. I am currently working as a member of the UAE Patriot SICO Team. I am sure that I would be a valuable asset to any Patriot System Integrations or Tactical Operations effort as I have a proven background in Patriot Systems Integrations and Tactical Deployments. Please see my resume for more information.

Best Regards

Charles Wurm
